Ave.**CHICAGO, ILL.****"Larco" Pipe Wrenches**Unbreakable Steel
Frames
Strong Handles
and JawsThumb Screw
Removable
Lower Jaw,
Non-
Slip Adjustment

The frame is made of hot rolled strip steel, pressed into shape and dovetailed together in the front. Regardless of the strain the Larco frame cannot be broken, spread or sprung. The design of the Larco frame keeps the jaws in line.

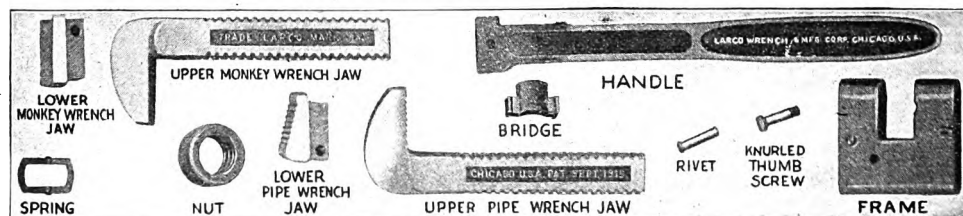

The lower jaw on the Larco is a separate unit and can be replaced without replacing the handle. The lower jaw is held in place by a thumb screw, which permits instant replacement.

Double acting jaws remove the strain from the frame rivet. When pulling down on the handle both jaws come together. Insures better grip and more effective release. The strain of the Larco is placed on the broad surface at the end of the handle that comes in contact with the lower surface of the insert jaw.

There is but one spring on the Larco being under the adjustment nut, preventing the adjustment from slipping.

Not fastened to the frame or handle, the spring can be readily replaced. *The Larco is not dependent upon the spring for its grip.*

The hook jaws being made longer will take oversize pipe. All parts are properly machined and closely inspected. The forgings are held to exacting requirements.

Prices of parts and weights of monkey wrenches same as the pipe wrenches. Parts are interchangeable.

"Larco" Price List—Subject to Discounts

Size	8 in.	10 in.	14 in.	18 in.	24 in.	36 in.
Taking Pipe Up To	$\frac{3}{4}$ in.	1 in.	$1\frac{1}{2}$ in.	2 in.	$2\frac{1}{2}$ in.	$3\frac{1}{2}$ in.
Wrench Complete.....each	\$2.25	\$2.50	\$3.50	\$5.00	\$7.25	\$13.50

**"Larco" Monkey Wrench**

The same workmanship is used in the construction of the LARCO Monkey Wrench as in the pipe wrench. They are similar in design with the exception of SMOOTH JAWS.

The jaws are also carefully heat treated which prevents their wearing and spreading.

Light, Compact and Easy to Handle.
